

LOHITHSAI MV

Tirupati, Andhra Pradesh | +91 78160 83389 | lohithsaimv@gmail.com

PROFESSIONAL SUMMARY

B.Tech Computer Science (Cloud Computing) student with strong analytical skills and hands-on experience in data analytics, Python, SQL, and Power BI. Experienced in analyzing business data, identifying churn and revenue impact, building dashboards, and presenting insights aligned with enterprise and consulting use cases. Demonstrates strong problem-solving, documentation, communication, and quality-focused delivery, with the ability to work independently or in team-based environments.

EDUCATION

B.Tech, Computer Science & Engineering

Siddharth Institute of Engineering & Technology | Sept 2022 – May 2026 (Expected) | CGPA: 7.89

SKILLS

Languages:	Python, SQL, Java, HTML, Javascript
Frameworks & Libraries:	Pandas, Flask, NumPy
Tools:	Power BI, Jupyter Notebook, Git/GitHub, Streamlit, Netlify, VS Code
Soft Skills:	Time Management, Adaptability, Communication, Problem Solving, Team Collaboration

INTERNSHIP EXPERIENCE

Full Stack Developer Intern (Data-Oriented Applications) | KW Tech (Startup)

- Developed end-to-end web applications using Python (FastAPI), MySQL, and React.js, supporting data-driven features *July – August 2025*
- Designed backend APIs to fetch, process, and validate data used for analytics and reporting.
- Wrote optimized SQL queries for data extraction, aggregation, and consistency checks.
- Ensured data quality and accuracy through structured validation, testing, and error handling.
- Collaborated with stakeholders to understand requirements and translate them into data-focused application logic and dashboards.

Data Science and Machine Learning Intern | Infotact Solutions

- Assisted in end-to-end data analysis workflows, including data collection, cleaning, and exploratory data analysis (EDA) *May – July 2025*
- Used Python (Pandas, NumPy) to preprocess datasets, handle missing values, and prepare data for modeling.
- Supported development and evaluation of machine learning models for business use cases.
- Performed model validation and performance analysis using standard metrics.

Frontend Intern | Think Champ

- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript. *May – July 2025*
- Assisted in displaying analytical data, tables, and charts clearly for end users.
- Improved UI/UX consistency and usability based on feedback and testing.

PROJECTS

Customer Churn & Revenue Impact Analysis

- Analyzed subscription customer data to identify churn drivers, retention risks, and revenue impact. *May – July 2025*
- Performed data cleaning, validation, and segmentation using Python and SQL to ensure data quality.
- Developed an interactive Power BI dashboard with KPIs, charts, and slicers to support management decision-making.

Green Cloud Computing: AI-Driven Carbon-Aware Energy Optimization

Nov – Dec 2025

- Designed a data-driven solution to optimize cloud workload scheduling by analyzing energy consumption and carbon intensity data while maintaining SLA requirements.
- Analyzed infrastructure and workload data to assess energy usage, carbon impact, and process efficiency in cloud environments.
- Built predictive models in Python to support data-driven optimization and decision-making for sustainable operations.
