

LOHITHSAI MV

Tirupati, Andhra Pradesh | +91 78160 83389 | lohithsaimv@gmail.com

PROFESSIONAL SUMMARY

B.Tech Computer Science (Cloud Computing) student with hands-on experience in data analytics using Python, SQL, and Power BI. Skilled in analyzing business data, identifying churn and revenue trends, and building interactive dashboards to support data-driven decision-making. Strong problem-solving, documentation, and communication skills with experience working in consulting-style, team-based environments.

EDUCATION

B.Tech, Computer Science & Engineering

Siddharth Institute of Engineering & Technology | Sept 2022 – May 2026 (Expected) | CGPA: 7.89

SKILLS

Languages: Python, SQL, Java, HTML, Javascript

Frameworks & Libraries: Pandas, Flask, NumPy, FastAPI, ReactJS

Tools: Ansible, Power BI, Jupyter Notebook, Docker, Git/GitHub, PostMan, VS Code

Soft Skills: Time Management, Adaptability, Communication, Problem Solving, Team Collaboration

INTERNSHIP EXPERIENCE

Full Stack Developer Intern (Data-Oriented Applications) | KW Tech (Startup)

Jan – Present 2026

- Developed end-to-end web applications using Python (FastAPI), MySQL, and Reactjs.
- Designed backend APIs to fetch, process, and validate data used for analytics and reporting.
- Wrote optimized SQL queries for data extraction, aggregation, and consistency checks.

Data Science and Machine Learning Intern | Infotact Solutions

Dec – Present 2025

- Assisted in end-to-end data analysis workflows, including data collection, cleaning, and exploratory data analysis (EDA).
- Used Python (Pandas, NumPy) to preprocess datasets, handle missing values, and prepare data for modeling.
- Supported development and evaluation of machine learning models for business use cases.

PROJECTS

Customer Churn & Revenue Impact Analysis

Aug – Sep 2025

- Analyzed subscription customer data to identify churn drivers, retention risks, and revenue impact.
- Performed data cleaning, validation, and segmentation using Python and SQL to ensure data quality.
- Developed an interactive Power BI dashboard with KPIs, charts, and slicers to support management decision-making.

Green Cloud Computing: AI-Driven Carbon-Aware Energy Optimization

Nov – Dec 2025

- Designed a data-driven solution to optimize cloud workload scheduling by analyzing energy consumption and carbon intensity data while maintaining SLA requirements.
- Analyzed infrastructure and workload data to assess energy usage, carbon impact in cloud environments.
- Built predictive models in Python to support data-driven optimization and decision-making for sustainable operations.

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Database Management Systems
- Data Analysis & Visualization
- Machine Learning
- Artificial Intelligence
- Cloud Computing

HOBBIES & INTERESTS

Chess, Reading books, Coding, Exploring new technologies.
